Featured Products 3 is the next generation of the Featured Products extension. Thus the previous versions (Featured Products 1.x and 2.x) won't be further developed to support the newest Magento versions. Most online stores have a section named 'featured products'. Your challenge is to make this section truly stand out and get the desired impact. Towards that end, Featured Products is a must-have Magento module for your store. You can statically or animatedly showcase products of your choice to lure them to explore the features and benefits of your product. As with all of our Magento extensions, you will have considerable flexibility to customize it to any store using our typically clean and intuitive user interface.
