FedEx real-time shipping rates module for X-Cart

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

The FedEx shipping rates module for X-Cart provides the necessary means to enable real-time FedEx Ground and FedEx Express shipping quotes in your online store. This module utilizes FedEx Direct API and is the alternative to using FedEx rate tables and zone charts for delivery calculation in default X-Cart. The main advantage is you will no longer need to import rates to X-Cart manually. Instead, each order's data is POSTed directly to FedEx transaction server to retrieve relevant shipping methods and rates depending on origin/destination addresses and parcel weight.
