

Fetch and Display Tweets in a Web Page

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This tutorial introduces some OOP concepts in PHP, and explains how to access and download tweets from a protected or public Twitter account, and how to create a quick-n-dirty cache for holding these tweets and protecting against the Twitter API limit. Includes sample code and an example implementation.
