File Download Script

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This free script will allow you to give your customers and clients the ability to download files from locations not specifically in your website root. For example, if you want to store the files in a secure location not on your site, and want your clients to be able to download from there, this free php script is for you!
