MASTER RESELL RIGHTS FOR THIS SCRIPT AND OVER 100 MORE INCLUDED IN THE PRICE!!! Drop this CGI script into any directory on your webserver and run it from the browser or telnet and it instantly does a search and replace (or delete) for any regular expression(s) in every file present inside the directory structure. Smartspider technology locates all files and will completely probe even the most complex subdirectory trees. Use it to replace (for example) any slogan, menubar, graphic link, phrase, misspelled word(s), old phone numbers, etc. Best of all is you can use this tool to remove all of those stupid MICROSOFT spam HTML tags & for example from your entire website. The CGI script counts, logs and reports on all files filtered in real time. CGI script is extremely fast.
