Mobile Number	{value_mobile_number}
Email	{value_email}

FindinSite-JS is a Search engine for web sites that consist of HTML, PDF, DOC, XLS, PPT and TXT files. Keep your search engine up to date - schedule FindinSite-JS to index your web site or intranet regularly, with a report emailed automatically. Administrators can then feel assured that their search engine is up to date with everyone's changes. The search screens are automatically shown in the user's preferred language. 15 Western and Asian languages are supported. The FindinSite-JS output can be customised using template files and variables. Search words in web pages can be highlighted. FindinSite-JS is a Java servlet Web Application that is easy to deploy in any Java servlet engine or application server. FindinSite-JS has been tested in Apache Tomcat and JServ, BEA WebLogic Server, Borland Enterprise Server, IBM WebSphere, Macromedia JRun, Sun Java System Web Server and Sun Java System Application Server.
