Five Star Admin Link System

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Problem: To get listed on another websites link page you often need to trade links. It can be a problem if the person submitting links doesn't have your ftp server information to update your links page. Solution: With this simple, but powerful links script you can give the username and password to the admin panel so that someone on your team can update the page with links. Allows deletion and editing of links also.
