Mobile Number	{value_mobile_number}
Email	{value_email}

This Amazon-style review script allows users to rank a product or item on a scale of 1-5 stars and make comments related to the product for other users to read. Has a built in directory/link feature. As an option, email notification will allow the administrator to approve comments before being added to the website. Admin panel allows the following: Approve a Review before it is listed, Delete a Review, Delete all Unapproved Reviews and Add Item for Review. A Google AdSense Revenue Sharing feature has been added. Allow your users to share revenue from ads displayed on their reviews! Can be turned on or off in the admin panel. Comments System. Allows users to write a comment about another's review. Google Base integration. Can be used to rate books, videos, music, websites...basically anything! Fast mysql backend and AJAX features. One template file controls the entire site/script layout. New features are added frequently! Top notch support is included!
