Flash 4 for Windows and Macintosh: Visual QuickStart Guide is a step-by-step guide to creating animated Web graphics using Macromedia Flash 4. This easy, visual approach to learning Flash takes the reader through the basics of vector drawing to the creation of animated multimedia files for the Web. Using this clear guide, professional Web designers, as well as hobbyists, can find out how to add sophisticated multimedia effects to their Web pages, without having to learn complicated scripting languages. Topics covered: using the editing environment, including the timeline, stage, toolbar, menus and keyboard shortcuts; creating and modifying objects, using layers, saving objects as symbols and using libraries; creating frame-by-frame animations, animations with motion and shape tweening; using masks, movie-clip symbols, interactivity with frame actions and buttons; adding sound to movies, complex interactivity, including conditional actions; preparing a movie for optimal playback on the Web, including Flash Player settings; and publishing HTML for Flash Player files.
