

Flash JPG Rotator

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

The Flash JPG Rotator enables you to show a couple of photos or banners in sequence, with fluid transitions between them. This way you'll be able to bring a little life to a static html page and show multiple images without the need to refresh a page. You don't need Flash to use this tool, though the fla archive has been included. Version 2 features lots of bugfixes, a new 'fluids' transition, and an optional navigation bar.
