Email	{value_email}

Learn the cool things possible using Flash and ASP. Attractive and interactive Flash interfaces make your pages look fun and interesting. This comprehensive guide teaches you all you need to know about integrating Flash with ASP. In relation to Flash, ASP can be used as a bridge between the database and the flash interface. The potential of Flash-and-ASP has not yet been fully realized and there are not many articles or guides on the web to help you through your quest to find out more. Smart Webby's Guide to Flash 'n' ASP Unleashed is designed to not only teach you to work with this less explored area of web development but also challenge and initiates you into trying to build products by yourself. It shows how to deal with real time situations like display and functioning of forms. Learn among other things how to make a Flash Guest-Book. Enjoy the visual and detailed learning experience that makes it easy for even a novice to understand quickly. It also has consciously included tips and guidelines for achieving better loading speed and small file sizes.
