Completely free and high customizable image gallery. All the backend is made in PHP with a simple administration interface which allows you to create categories and albums (Albums can also contains panoramic images) It uses amfphp (Flash remoting for PHP), the GD library for resizing images and PEAR::Mail for sending e-cards. Made with Flash 8 it has tons of features: - panoramic images support - thumbinails view - possibility to sort thumbs - auto update display on stage resizing - send e-cards, download images - commenting images - album description - rating images
