

Flat-File SQL

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Flat-File SQL (or fSQL for short) is a way to use SQL queries without having another database (like MySQL) installed. It uses regular files that you store wherever you want. At the moment, there is only a PHP version, but a perl version and possibly other language ports are planned.
