Flesk.Catalog

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Using simple tag scripting and normal HTML templates, you can deploy a product catalog to your website in minutes with almost no programming. Tags are defined in a XML file where rules are declared (ie: you may want that the Tag appears as a Currency, so you just have to define a rule that translates your tag into a currency, any currency). Flesk.Catalog includes Paging facilities, that can be linkbuttons or images or any kind of HTML value. Paging status text can be set as you wish (ie: 'Listing Page 1 of 10' or 'Showing 1 page in 10'). Pager can have separated CSS Styles for pager's link buttons and status. Using HTML templates you can have all diferent designs you want. The unique Flesk.Catalog's Nested Template System let's you set nested templates, so that you can control your dinamic website just as you want.
