<b>Email</b>	{value_email}

Flexigrid for Wicket brings the popular jQuery plugin Flexigrid to the popular Java web framework Apache Wicket. And it does so without requiring you to extend your Apache Wicket application from a custom class or configure any run-time parameters. And better yet, its extremely easy to use API hides away the complexity of reading Flexigrid's request parameters and writing a response back to it. Don't you wish all things in life were as simple?
