Flexphplink Pro

Address Contact Person Mobile Number Email {value_address}
{value_contact_person}
{value_mobile_number}
{value_email}

Written in PHP and Mysql, Flexphplink pro allows you to easily add, edit or delete links to your site. Subcategory link definition is allowed. Easy for internationalization. The front pro can automatically record the traffic. There is also an admin system to create the categories, generate search engine friendly pages and edit inappropriate links. This is also a great resource to add to any website as it allows other webmasters to exchange links with you. Low price customization service available.
