FlexWizard makes updating your web site as easy as sending an e-mail. It works by inserting your e-mail content into your existing pages via a Java script. Simply define content areas (Flexwindows) on your site, then send an e-mail. It makes a perfect solution to update fast changing content, like the latest news, schedules, web logs, price info etc. The FlexWizard is an easy to use interface, that assists you in setting up the system.
