Floating Email-This-Link Script With URL Auto-Capture

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This script creates a floating layer with an email-this-link script in it. The layer can be positioned anywhere on the screen, and it will float to that position whenever the window is scrolled. Enter the recipient address and click the send button, and the visitor's email client is opened, complete with a message in the email body that includes the link for whatever page in which the script is placed.
