

Floating Webpage Toolbar

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Our Floating Webpage Navigation Toolbar, written in php and javascript, enables your visitors to select from a multitude of site options via a floating navigation bar. With this companion, users can increase the text size, decrease the text size, change the font face, print the current page, add the site to their favorites or social bookmarking sites, etc. This website add-on can display any HTML content, including flash animations. Seriously, it will, we're not lyin'! Add, remove, modify buttons and/or functionality as desired. The online demo is sad today. Would you mind floating over and showing some love? Check out our new eDelivery system as well!
