

Folders To Gallery Script

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

No database required for this script. Just one file that scans all the subdirectories under it and then creates categories and galleries based on the folder names. Script consists on one asp file and two image files. Uses the file system object to create the galleries. The script does have a few options, read the readmenow file to figure out how to set them.
