Fonts Site Script - Over 9,300 bundled fonts

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Features:- Over 9,300 free fonts. These originated from another free fonts site on the web. - Written in php/mysql with access to 99% of the source code. - All pages are created using Apaches mod-rewrite so it looks like over 9,300 flat html pages to the search engines. - Automatic creation of the font preview images. - Custom preview images so users can view the font in their own text online. - Character map for all fonts. - Contents listing/view link for all font zip files. i.e. any additional readme/txt files in the distribution. - Basic admin area to upload new fonts. From this the previews, contents listing etc are all automatically created. - User rating for each font. - Total downloads for each font. - Overall downloads by day/all time displayed in the top right of the pages. - Browse page organised by letter. - Search page.- Admin maintenance - clear font preview cache.- Control preview font size via config. - Control preview text via config. Use the font name or your own text.
