

FontSiteScript Font Listing Site Script

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

-List new fonts with the click of a button (including file upload) -View and edit existing fonts with the administrative backend -Change the sample text to match your site's theme -TPL template (easy to replace, easier to change!) -Simple installation (usually under 10 minutes) -Written completely in PHP/HTML for smooth usage -Attaches to a MySQL database to store font information -Simple for users to download fonts (protected with a font ID download system so people can't offer direct file downloads from your site) ... and much, much more! Check out the demo for more information!
