Food Delivery Script is an online application for restaurants, pubs, pizza shops, or any other food related service providing a simple integration code to embed online food ordering system into a website. Nice and easy-to-use food ordering system: intuitive AJAX based front-end allows customers to browse through the menu and order food online without any hassle. Customers can choose between delivery and pickup, apply discount codes and select different payment methods. More than just food ordering system, Food Delivery Script also provides restaurant owners with a web-based restaurant menu management feature and the ability to customize their food delivery system. Once you have food delivery software installed, no programming knowledge is required to create custom menu list and menu categories, manage online orders, pick-up and delivery areas, payment options and vouchers. Food Delivery Script is fully supported, affordable and scalable restaurant delivery software.
