

FORMMAIL.asp CDONTS w/database functionality

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

*Formmail.asp processes a form to email, a form to database or both.
 *Easily customized actions based on switches set in the form.
 *This is a secured form to email script that keeps your site from being used as an open relay (by a spammer). *One script does it all!
 *The time saved will easily cover the cost of this script.
