

formReplacer - fully customize your form elements

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

The biggest benefit is of course the ability to style those elements however you like! Say goodbye to the pesky and inconsistent styling. Each element is created using common HTML elements like spans and lists. You only need to alter few CSS rules to completely change their appearance and perfectly match them to your website. Now that's full control.
