

# frame redirection script

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

This allows a webmaster to have a service like what appears on a lot of the big link sites, when you click on a link the site displays a frame at the top with their info and the link is displayed in a frame underneath. This script will do this, also shows how put ion your own advertising if required in the top frame.
