CMMS Maintenance Software is 100% free, no tricks, no hidden gotcha's, no time limits and best of all, it doesn't require maintenance software to be installed on the desktop! This maintenance software actually sits on one computer in your network and you use a web browser to access the maintenance program residing on that system. Because this system is on your internal network, the maintenance software is only visible to your company computers, never the outside. CMMS is configured to not allow outside internet users to use the maintenance software, but if you do want to allow this, your IT staff can configure the system for secure CMMS access in seconds. Easy to use and easy to install!
