

# Free Email Encoder

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

This online tool encodes your email address, and shows a Javascript which you can use right away. Spam should be history. Your email is only visible to human visitors, not to email harvesters. This tool is always one step ahead of spammers. Includes options to create a link with your name (encoded also) instead of email address.
