

Free Encryption Software

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This encryption script make a series of consecutive encryption steps to ensure security. 11 key values are derived from a key sentence and used to hide all possible origin patterns. The encrypted result is a number raw string, which can be decoded for each one who knows the key sentence.
