

## Free Form-to-file

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

This personalized copy and paste script will save to a file information obtained from any form independently of input fields number. It will create all necessary folders and files in the server. Each time a form is processed a new file will be create, and in order to check information in those files a copy and paste script is also provided. The script is personalized with a random number for each visitor to the page.
