## **Free Online Graphing Tool**

Address Contact Person Mobile Number Email

{value\_address} {value\_contact\_person} {value\_mobile\_number} {value\_email}

Graphs are dynamically generated on the fly, based on the parameters you specify. The URL takes the user to a web interface (HTML form). Simply fill out your values and submit the form, a graph will appear. Additionally a URL will be displayed, which can be copied into remote web pages and have techie-blogs generate the graph on your site.
