

## Free WebFTP

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

So far, only download functionality, but uploads and possibly other functions will hopefully be added soon, as well as some major optimizing. Uses customizable style sheet, which most other FTP scripts don't allow, making it easy to make it look good on your page. Feel free to email with any questions, comments, suggestions, or hate mail.
