

FTPS Secure Upload Applet

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

jClientUpload 1.6 is an applet allowing to upload files and folders through FTPS (FTP over SSL). It supports both implicit and explicit TLS. It provides features such as progress bar, resume broken upload, renaming template and overwrite policy. Resources are customizable (messages, colors, images, ...) and ready for multilanguage.
