Fully Functional ASP Forum

Address   {value_address}

Contact Person   {value_contact_person}

Mobile Number   {value_mobile_number}

Email   {value_email}

This is a fully functional ASP Forum, where people can submit their doubts about something for example and others can answer. It is not a complicated code, but very effective - great for people who want to learn how to deal with databases (recording, reading, separating in many pages and so on). If you want to start working with ASP, it is a must see.
