FWA interactive help

Address   {value_address}

Contact Person   {value_contact_person}

Mobile Number   {value_mobile_number}

Email   {value_email}

Display an inline window or a sepatate window with your help texts based on the context. You don't need to change your current application interface, the interactive help displays on the top and allows your users to continue their work in the application while consulting the help texts.
