This image gallery is unique because it preserves the width of the image after loading, and rotates the image horizontally to allow full viewing. This is excellent if you have those giant panoramic image which extend for a very large width. This gallery allows for easy categorization of your image in separate folders. Like the other Flash image galleries on TUFaT.com, this gallery includes an XML configuration file. This gallery, like all scripts on TUFaT.com, includes FREE UPGRADES forever. It also includes 100% of the Flash source code, and a simple documentation file in the form of a Word document. Free user-to-user support is available on the support forum
