Mobile Number	{value_mobile_number}
Email	{value_email}

The principle function of Gallery Media extension is that it allows you to upload images and videos from file or URL, then to organize and group them based on categories, topics... More than that, our Gallery Media is quite different from other same kind modules. Not stop at photo albums, our new extension allow you to easily upload videos from your computers or from Youtube URL. You can also help your customers smoother in watching video by allowing them to preview video in media list In addition, customers also can give feed back to your videos by reviews and ratings after watching. Guests also can leave their reviews and ratings without logging in your websites based on your setup in the backend. To lead your customers pay attention to some specific photo and video, you can turn on the featured media function in the backend
