<b>Email</b>	{value_email}

PHPGcount is a PHP graphical hit counter. It uses flat-text database so no SQL databases are necessary. It comes with many styles to choose from and you can add your own styles easily! It can count hits for multiple pages of your website or even websites on other servers. It can be configured to count unique visits only. The count is displayed on the page using a simple Javascript code. You can use one copy of the script to count hits on several pages.
