Email	{value_email}

GegaByte Component Maker is a program, designed and built keeping in mind to make things simple for the user, with GegaByte Component Maker you can make your very own custom Joomla components in a matter of minutes, which are ready to install saving you hours and hours of time. The current version of GegaByte Component Maker supports Joomla 3.x platforms. We are working hard to include each and every Joomla component fields. GegaByte Component Maker follows the MVC structure and formatting guild lines. Components made with GegaByte Component Maker are JED Checklist compatible, hence saving hours of time while submitting the Component on Joomla Extension Directory (JED).
