

Generate Excel files

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Generating Excel files from web pages or other applications is a major subject in many articles. I'd like to present here some solutions, part of them, already presented and well known. Some of them require MS Excel to be installed on the server, and other not. Read here a few solutions.
