A majority of people on the Internet are searching for local results. It's time to capitalize on those searches. GEO GENERATOR is a simple PHP program that allows you to match your product or service with over 30,000 US cities and states. Let's say you are a florist in your city and state. With GEO GENERATOR you can create a 30,000+ keyword list to attract customers outside of your area. Our program asks you for your keyword and within seconds you have a text file of all US cities and states along with your keyword. See an example below. Example Output: New York Florist Florist New York Manhattan Florist Florist Manhattan And so on...
