

# getPortal

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

getPortal's Customisation extends the functionality beyond a normal website. It is perfect for creating unlimited extranets, customer portals, vendor and partner portals. Each mini web section will give the intended user only access to information and applications relevant to them. For example you can easily give customers access: Mini web section within the portal, User Registration and Login, Shared document folder and files, Events Calendar and User Calendars, Online Forums, Call Logging, online Quotes, compliment and complaints forms, quick polls, Advertising Banner management and stats, and a highly sophisticated content management system. Have a look at the portal we have designed and developed.
