

# Google:map JSP Taglibrary

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

The Google:map JSP Taglibrary allows you to create fully functional GoogleMaps™ on your website with no javascript or AJAX coding, and no need to spend valuable time learning the API. Integrate with JSTL to create dynamic database driven maps. Includes geolocation for US and International street addresses and IP addresses.
