

GoogleBox ASP

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

GoogleBox ASP allows you to display the Top 10 search results from Google for a particular search query on your web page. Uses RDF/XSLT to format and syndicate the results and includes a 'more' results link which takes you to results 11-20 on Google for the particular search. The only minimum requirement is MSXML 3 or higher. It also supports the MS SOAP Toolkit and IP*Works for ASP SOAP component. Blank entry fix.
