Graphics, Animation and Interactivity with Flash 4.0 provides the information needed to make the most out of web site design by using Macromedia Flash 4.0. This book includes explanations that are straightforward and easy to understand and provides examples of the common functions needed to apply this program. Find complete coverage of vector animation as well as information on ad banners, buttons, and animated corporate logos. Coverage includes information on how to integrate sound with animations, create vector images with transparency, and create quick loading animated sequences to play while the rest of the web content downloads. This book is the perfect web design tool and desk reference.
