Hercules Image, Banner Rotator is a PHP script, which rotates your images and banners with a JPG (JPEG), GIF, or PNG extension from any location. Hercules Image Rotator uses Flat File (txt file) and does not need MySQL or any other DB. Does not need Java or JavaScript enabled. It is very simple to sets the image/banner dimensions and time to rotate it. Possibility for multiple rotators with different dimension and different rotation times on one page and faster displaying. New feature - random image displaying.
