Mobile Number	{value_mobile_number}
Email	{value_email}

All of us love WordPress, but in most cases we prefer to hide the fact that we are using a blogging platform for our entire business. From other side every day a couple of new security bugs found in plugins, themes and WordPress itself. We should ask: Are we safe? Can all plugin authors be notified timely about bugs? Can we download update versions everyday? or are all of plugin authors are responsible for security problems they generated? Hide My WP created to help us. It not only boosts our security but it also allows us to have beautiful and customized URLs! It hides wp-login, wp-admin folders, change author permalinks and let us to replace or delete any words in our content or theme. Please note this is a long waited plugin and no free or premium alternative is available!
