<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

In most of the web newsgroups applications, users lose the "tree" view of the messages (their hierarchy), something necessary to understand the correct message sequence. This application supports all of the important characteristics from traditional newsgroups. Features includes user registration, private and public newsgroups, file attachments (can be limited to some users), rich text editor, and more.
