HiFriend is a free, cross-platform email-a-friend / tell-a-friend solution for websites, which allows web users to invite their friends to visit any webpage in your website. One installation of HiFriend is sufficient to drive a whole website, and allows a user to contact multiple recipients at once. Includes external HTML templates for easy editing of the appearance of all client facing elements, comments section for your users to send a message with the referral, and the ability to customise your own message too.
