Horner's Algorithm

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This tutorial will teach you how to run the Horner's algorithm, for number convertion. It converts numbers from specified numeric system into decimal, without using powers, which makes the whole process faster. The tutorial won't explain why these arithmetic calculations do so, but just how to run them.
